

KEEP OUT OF REACH OF CHILDREN
READ LABEL BEFORE USE

SPREADWET 1000

ACTIVE CONSTITUENT : 1000 g/L ALKOXYLATED ALCOHOLS

**Premium quality *Biodegradable*
wetting and spreading agent
for use with
insecticides, fungicides
and herbicides.**

5 LITRES

WARNING: May be harmful if swallowed. Causes skin irritation. Causes serious eye damage. May cause damage to the organs through prolonged or repeated exposure by ingestion, by inhalation. Toxic to aquatic life. Harmful to terrestrial vertebrates.

PRECAUTIONARY STATEMENTS: Keep out of reach of children. Read label before use. Do not breathe dust/fume/gas/mist/vapours/spray. Wash contaminated skin thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.

RESPONSE: If medical advice is needed, have product container or label at hand.

If swallowed immediately call a poison centre/doctor. **0800 POISON (0800 764 766).**

If on skin: Wash with plenty of soap and water. If skin irritation occurs get medical advice/attention. Take off contaminated clothing and wash before reuse.

If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue washing.

DISPOSAL: Avoid release to the environment or contaminating waterways. Dispose of contents to comply with local, state and federal regulations.

Directions for use

Situation	Application Rate	Critical comments
Horticultural sprays		
Insecticides and Fungicides	25-75ml/100 L	Recommended for addition to all horticultural sprays except where formulation has sufficient wetter.
Knapsack	4ml/15 L	
Vineyard Grapes	75ml/100 L	
Protected glasshouse horticultural crops	10mL/100 L	Rate for sensitive crops in protected glasshouse situation.
Weedkilling sprays		
High vol. power spray	10 – 50ml/100 L	Refer to individual herbicide labels for specific recommendations.
Low vol. boom spray	40 - 100ml/100 L	
Knapsack	4ml/15 L	
Glyphosate	100 – 200 mL/100 L	In situations where an organosilicone is not specifically required.
Paraquat and Diquat		
Boom spray	25 - 100ml/100 L	At low water rates to achieve maximum efficiency the higher rate of Spreadwet 1000 is used to ensure even coverage of plant foliage and to increase absorption.
Knapsack	15ml/15 L	
Soil Residual Herbicides		
e.g. Diuron, Simazine, Atrazine	100ml/100 L	When applying soil active herbicides such as DIURON flowable herbicide to standing weeds add Spreadwet 1000 to thoroughly wet foliage. Check specific product labels for individual recommendations.

NOT TO BE USED FOR ANY PURPOSE OTHER THAN INDICATED ON THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Spreadwet 1000 is a premium quality biodegradable non-ionic surfactant for agricultural and horticultural sprays. It contains 100% w/v active ingredients suitable for use with fungicides, insecticides and herbicides. Spreadwet 1000 reduces the surface tension of spray droplets causing them to spread and adhere to the target in a continuous film. This assists penetration and uptake of the spray on to waxy or hairy plant surfaces, fungous lesions, disease infection sites and insects. Spreadwet 1000 mixes easily with all types of water and will not injure tender foliage if used as directed.

HERBICIDE SPRAYS

Spreadwet 1000 can be added to many herbicide sprays to increase their efficiency. Wetter should be added only where directed on individual labels, as use with selective herbicides outside label directions may reduce crop selectivity. For folia active herbicides spray to the point where leaves and stems are just wet. Spraying beyond this point will encourage run-off and loss of spray chemicals. When spraying hard to wet waxy or hairy leafed plants increased rates of Spreadwet 1000 can increase activity. When treating dense, tall vegetation with folia herbicides it is important to thoroughly wet leaves and stems for efficient herbicide performance.

MIXING

Spreadwet 1000 mixes easily with water and should be added directly to the spray tank after the addition of other components.
